

Businesses play a key role in supporting the development of a sustainable and prosperous society. As the leading Environmental and Social consulting firm in Uganda and the Region, Eco and Partner has achieved enormous benefits out of the services and projects we deliver to our Clients. We strive to minimize the negative impact and risks of our operations and increase the positive, fostering our reputation as a sustainability leader in the industry we operate in. Eco's comprehensive approach to sustainability is embedded in our Sustainability Policy Statement with a stated purpose to 'shape a sustainable future with the World's leading Organizations'. A sustainable future is aligned with the 2030 ambition of the Sustainable Development Goals (SDGs).

Our Strategic Objectives

At Eco, we achieve sustainability goals through integrating Environment, Social and Government Strategy (ESG). Our approach is delivered primarily in the following key Policy Statements:

Our clients

We prepare our Clients for the future by understanding trends related to society, environment, climate change, technology, resources, pollution prevention and while incorporating sustainability in their operations.

Our Expertise

We provide expert consulting services in sustainability, energy, climate change and environment and society to help improve sustainable performance, reduce impacts and risks, costs, create brand value, manage and mitigate any adverse impacts and risks across organizations.

Our Operational Excellence

We actively manage and improve our own environmental, social and governance performance by driving improvements in our own sustainability performance, through Sustainability Action Plans in each Business Unit level initiatives.

Our People & Culture

We actively participate and deliver positive impact on societal challenges such as climate change mitigation and adaptation.

Our Approach

We will deliver on these objectives by conducting our business in a manner that creates a positive impact on our environment and society, and by taking a proactive role in delivering the best solutions for all stakeholders.

Impact with clients

By providing strategic consulting and technical services in the environmental, health and safety (EHS), risk and social areas, ECO assists clients achieve sustainable outcomes for the planet and society. ECO most frequently works with the largest infrastructure project in Uganda including those in the oil and gas, energy, roads and transport, mining, and manufacturing sectors. ECO is uniquely positioned to assist clients tackle complex sustainability challenges and opportunities by integrating our commercial with technical excellence and deep understanding of societal expectations while meeting both local and international laws, regulations and standards.

Impact from our operations

Each Business Unit has a Sustainability Action Plan that contributes to the global goals and targets at the local level. Each Action Plan is driven by members of ECO's employee-led Sustainability Team, and overseen by each Business Unit Management Representative. Sustainability Action Plans underpin ECO's broader approach to embedding sustainability in our operations, through policies, procedures and programs that cover each of our material topics. All employees are responsible for complying with the Sustainability Policy. Reports on progress will be made annual basis to Management and the Board of Directors.

Impact from non-client collaborations

ECO works with a wide range of non-governmental and multi-stakeholder organizations to innovate and contribute to society and local communities.

Reporting

ECO will report publicly using the Global Reporting Initiative (GRI) Standard in an Annual Sustainability Report by 2024.
